SUMMARY

Detail-oriented Data Analyst with expertise in Power BI, SQL, Excel, and Python. Skilled in dashboard development, KPI tracking, data modelling, and Exploratory Data Analysis (EDA). Strong analytical mindset with the ability to translate business requirements into data-driven solutions.

CORE SKILLS

Data Analytics | Power BI (DAX, Modelling) | SQL | Excel (Power Query, Pivot Tables) | Python | Data Visualization | Dashboard Development | KPI Tracking | EDA | Problem Solving

TECHNICAL SKILLS

Data Analytics: Power BI (DAX, Modelling), SQL, Excel (Pivot Tables, Power Query), Python (Pandas, NumPy, Matplotlib), Google Looker/Data Studio, Google Site

Tools & Platforms: Jupyter Notebook, SQL Workbench, VS Code

Soft Skills: Problem Solving, Communication, Teamwork, Analytical Thinking

WORK EXPERIENCE

Physics Wallah Noida, India

April 2026 – Present

Business Excellence Data Analyst Intern

- Analyzed and cleaned data for accurate reporting, ensuring high data integrity and reliability.
- Created comprehensive dashboards to track KPIs and monitor overall business performance.
- Worked collaboratively with cross-functional teams to deliver actionable, data-driven insights.
- Built internal websites using Google Sites for information sharing and streamlined process management.

PROJECTS

E-Commerce Sales Analytics Dashboard

Power BI, Power Query

- Designed a complete KPI-driven dashboard tracking Sales, Profit, Quantity, and Shipping Cost.
- Cleaned and transformed data using Power Query; built a star-schema model for accurate reporting.
- Created dynamic visuals for Country, Market, Category, and Ship Mode with interactive slicers.

Multimodal Medical Diagnosis - Ensemble Learning

Python, ML, CNN

- Cleaned and normalized MRI/CT imaging datasets for advanced medical analysis.
- Implemented Random Forest, SVM & Gradient Boosting combined with CNN to achieve improved diagnostic accuracy.
- Visualized model performance metrics and data distribution for better interpretability.

Music Recommendation System

Python, Spotify Web API

- Built a content-based music recommendation system using cosine similarity on audio features such as danceability, energy, tempo, and valence.
- Integrated Spotify Web API for real-time song discovery, artist metadata, and popularity retrieval.
- Designed a hybrid architecture combining live Spotify metadata with a curated audio-features dataset to overcome API access limitations.

Leaf Disease Detection

Python, CNN, EDA

- Processed image dataset and performed Exploratory Data Analysis (EDA) on class distribution.
- Built a Convolutional Neural Network (CNN) model and evaluated performance using accuracy metrics, confusion matrices, and training curves.

EDUCATION

B.Tech (Computer Science Engineering)

8.63 CGPA

Intermediate (12th Standard)

95.3%

Galgotias University (2021 - 2025)

D.A.V. Public School (2021)

Matriculation (10th Standard)

95.2%

D.A.V. Public School (2019)

CERTIFICATIONS

- CELONIS Process Mining Virtual Internship
- AWS Machine Learning Virtual Internship
- AWS Cloud Foundation Certification
- AWS Data Engineering Internship
- TATA Forage Data Visualisation Program
